DENTISTRY**

## FACULTY OF DENTISTRY

With a long time in dental education, our faculty continues to grow and diversify with a student focused faculty and professional staff and a wide range of community-oriented research interests.

The Master of Science Program in Dentistry gives students the opportunity to learn through hands-on experiences within our one-of-a-kind dental hospital and the Royal Dental Mobile Unit, financed by the Royal Foundation.

The program prepares students for the next level in career advancement through a challenging and professionally focused curriculum that enriches:

***Clinical Knowledge***—Enabling dental practitioners to improve the scientific basis of practice, update content knowledge as it relates to Oral Health Sciences, and leverage skills related to critical inquiry.

***Research Skills***—Deepening the knowledge in research design and implementation, oral health science theory and practice. and current issues related to dentistry.

***Community Service Skills***—Unleashing community service expertise by practicing in the dental hospital and assisting in the Royal Mobile Unit.
